Here is the list of sight words that we use in Reception. Work your way from bronze. You can help your child to learn to read these words in lots of different ways. You could…

- make a sight word splat game
- make silly sentences out of the sight words
- stick them up around the house and go on a sight word hunt

If your child is ready for something a little bit different, the next step is writing the words. Learning to spell these words will help your child with their writing. Have a go at writing after your child can read each list.
